

EMR Delivery Body Customer Portal Road Map

EMR Delivery Body Customer Portal Road Map

Key

-  Completed
-  Planned
-  Expected

-  Confirmed workstream
-  Significant Milestone

Continuous Improvement

Q3 Single ID access to multiple portfolios - based on significant customer feedback, we have prioritised a wider system change that delivers enhancements to accessing multiple portfolio of companies via single log on credentials. This workstream represents requirement gathering, requirement validation, IT Development, Demonstration and Implementation. You can now see the high level requirement playback detail in the slide deck found under the 'User Group' section of the EMR DB Portal website, go to 'User Group'

Q3 Customer Enhancements - The prioritised enhancements for Q3 delivery have now been confirmed. This workstream represents requirement gathering, requirement validation, IT Development, Demonstration and Implementation. The prioritised enhancements are;

1. Secretary of State adjustments to Auction Parameters - This change relates to where the Secretary of State makes any adjustment to the Auction Parameters as defined under Regulation II relating to (d) onwards
2. Assessment Code Conditional Reason field - This is a change an open text field, that specifies the PQ conditional reason, within the DB assessment code feature to a drop-down list
3. Alphabetical order of specific drop-down lists - This change relates to a number of areas where the current drop-down list options are not in alphabetical order, including Prequalification Assessment Codes.
4. Text Amendment - This is a change to Helper text for the Asset Group declaration whilst cloning

Q3 Technical Enhancements - modifications to portal to help improve performance, usability and functionality.

Capacity Market User Group Engagement - Playback sessions will summarise proposed Enhancements with a view of obtaining customer prioritisation, requirement validation on changes we intend to deliver in the next available development phase as well as system demonstrations post development to present new system functionality.

Capacity Market Register & Exhibit Library tool enhancements implemented

1. Capacity Market Register (CMR) Search functionality - This enhancement enables customers to conduct more comprehensive searches, making it easier to locate and access relevant information quickly. By extending the search capability to include date ranges and CMR description, customers can efficiently retrieve specific CMRs without limitations, enhancing overall usability and productivity.
2. Arrange CMU ID values in alphabetical order from drop down menu in Exhibit pages D, F, G, ZA, ZB - This customer enhancement will allow users to view CMU IDs in alphabetical order when using the Exhibit Library tool. By simply sorting CMU IDs alphabetically, users can streamline their search process and improve overall efficiency when creating new Exhibits from the Exhibit Generator tool.

PQ Application enhancement implemented

Ability to delete a saved or withdrawn Prequalification Application or Opt-out application functionality made available.

Q4 CMU, Component & Application Validation Feature - also based on significant customer feedback, we have prioritised a feature review of additional system validations against the CMU, Component & Application in order to improve customer experience.

Q4 Customer Enhancements - Prioritised enhancements for Q4 delivery have not yet been confirmed. Collaboration with the Capacity Market User Group will help define enhancements. This workstream represents requirement gathering, requirement validation, IT Development, Demonstration and Implementation.

Capacity Market Registers (CMR) to be published on the NESO Data Portal - EMR Delivery Body are looking to publish CMRs on the EMR Salesforce Portal as well as the NESO Data Portal. Expect further communication in due course. Based on customer feedback, this change will provide the ability for customers to interrogate data more effectively.

Customer Portal Survey - As part of the Continuous Improvement phase for the new portal, we intend to publish a customer portal survey which will be open for a short amount of time to gather your feedback. It is critical for us to receive and consider your feedback to feed into the improvement plan.

EMR Delivery Body Customer Portal Road Map

Rule & Regulatory Changes

2024 Rule Changes enacted - DESNZ and Ofgem - please see Capacity Market Rules for further information

CM Rule Change Consultation - Ofgem - Ofgem Statutory Consultation on Capacity Market Rule change proposals.

Consultation and Call for Evidence on proposals to maintain security of supply and enable flexible capacity to decarbonise (15 Oct - 10 Dec) - The Department for Energy Security & Net Zero have published a consultation and a Call for Evidence seeking views on changes to the Capacity Market that aim to retain the flexible capacity required to maintain security of electricity supply in the short-term and support the conversion of unabated gas plants to low carbon technologies. The consultation and Call for Evidence will be open for 8 weeks, closing on 10 December at 11:59pm

Capacity Market Phase 2 Changes - The Department for Energy Security & Net Zero have published a policy update outlining the next step for those policies in the Phase 2 consultation that were not immediately progressed after the general election. The following changes will be put into effect via changes to the CM Rules and Regulations and will be in place for the July 2025 Capacity Market prequalification window, ahead of the 2026 auction

CM Rule Change Consultation - Ofgem - Ofgem have confirmed this consultation will include the Change Proposals which have been submitted by the Capacity Market Advisory Group (CMAG) as of CMAG Meeting 25. These changes are detailed in the slides from CMAG 25 which are available on the Elexon CMAG website.

EMR Delivery Body system change commitments

DEP Customer Authentication - single point of access into the ESO data, content, and external-facing processes through our Digital Engagement Portal (DEP)

EMR DB Website Changes - EMR DB plan to transition from the current Delivery Body website (www.emrdeliverybody.com) to the a webpage hosted on the new NESO website. The NESO platform will provide a comprehensive and user friendly resource for information on the Delivery Body, the Capacity Market, and Contracts for Difference schemes. This transition will support an improved digital experience for our stakeholder by centralising and enhancing accessibility to key resources and updates.
