# **EMR Delivery Body Customer Portal Road Map**

## **EMR Delivery Body Customer Portal Road Map**

### Key

## **Continuous Improvement**

Q3 Single ID access to multiple portfolios - based on significant customer feedback, we have prioritised a wider system change that delivers enhancements to accessing multiple portfolio of companies via single log on credentials. This workstream represents requirement gathering, requirement validation, IT Development, Demonstration and Implementation. You can now see the high level requirement playback detail in the slide deck found under the 'User Group' section of the EMR DB Portal website, go to 'User Group

Q3 Customer Enhancements - The prioritised enhancements for Q3 delivery have now been confirmed. This workstream represents requirement gathering, requirement validation, IT Development, Demonstration and Implementation.

The prioritised enhancements are;

- 1. Secretary of State adjustments to Auction Parameters This change relates to where the Secretary of State makes any adjustment to the Auction Parameters as defined under Regulation 11 relating to (d) onwards
- 2. Assessment Code Conditional Reason field This is a change an open text field, that specifies the PQ conditional reason, within the DB assessment code feature to a drop-down list
- 3. Alphabetical order of specific drop-down lists This change relates to a number of areas where the current drop-down list options are not in alphabetical order, including Prequalification Assessment Codes.
- 4. Text Amendment This is a change to Helper text for the Asset Group declaration whilst cloning

Q3 Technical Enhancements - modifications to portal to help improve performance, usability and functionality.

Capacity Market User Group Engagement - Playback sessions will summarise proposed Enhancements with a view of obtaining customer prioritisation, requirement validation on changes we intend to deliver in the next available development phase as well as system demonstrations post development to present new system functionality.

#### Capacity Market Register & Exhibit Library tool enhancements implemented

- 1. <u>Capacity Market Register (CMR) Search functionality</u> This enhancement enables customers to conduct more comprehensive searches, making it easier to locate and access relevant information quickly. By extending the search capability to include date ranges and CMR description, customers can efficiently retrieve specific CMRs without limitations, enhancing overall usability and productivity.
- 2. <u>Arrange CMU ID values in alphabetical order from drop down menu in Exhibit pages D, F, G, ZA, ZB</u> This customer enhancement will allow users to view CMU IDs in alphabetical order when using the Exhibit Library tool. By simply sorting CMU IDs alphabetically, users can streamline their search process and improve overall efficiency when creating new Exhibits from the Exhibit Generator tool.

#### PQ Application enhancement implemented

Ability to delete a saved or withdrawn Prequalification Application or Opt-out application functionality made available.

**Q4 CMU, Component & Application Validation Feature -** also based on significant customer feedback, we have prioritised a feature review of additional system validations against the CMU, Component & Application in order to improve customer experience.

**Q4 Customer Enhancements -** Prioritised enhancements for Q4 delivery have not yet been confirmed. Collaboration with the Capacity Market User Group will help define enhancements. This workstream represents requirement gathering, requirement validation, IT Development, Demonstration and Implementation.

## **Rule & Regulatory Changes**

2024 Rule Changes enacted - DESNZ and Ofgem - please see Capacity Market Rules for further information

CM Rule Change Consultation - Ofgem - Ofgem Statutory Consultation on Capacity Market Rule change proposals

## **EMR Delivery Body system change commitments**

**DEP Customer Authentication** - single point of access into the ESO data, content, and external-facing processes through our Digital Engagement Portal (DEP)
