Commentary

The market was predominantly short throughout the day except for some long periods between 00:00-07:30, 21:00-22:00, and 22:30-24:00. No Trades were required for Downward Regulation or Margin. BM Actions were required to manage thermal constraints in Scotland during early periods and in England during midday. BM Actions supported Voltage Control and further BM Actions supported System Inertia.
