Headline Report Special CUSC Panel 08 November 2024

The Headline Report is produced after every Panel and aims to provide an overview of the key decisions made. Minutes for this meeting will be published separately.

Workgroup Reports

The following Workgroup Reports were presented to the Panel:

CMP434 Implementing Connections Reform

This modification introduces new processes and definitions that will update the existing processes and enable projects that are most ready to progress more rapidly to connection.

The Panel agreed that the Terms of Reference have been met and agreed for CMP434 to proceed to Code Administrator Consultation, subject to the minor formatting changes to the legal text being incorporated. The Code Administrator Consultation will be published on 08 November 2024 and will close at 5pm on 26 November 2024.

CMP434 documentation can be found here.

CMP435 Application of Gate 2 Criteria to existing contracted background

This modification looks to extend the Gate 2 concept and some features of Gate 1 (outlined in CMP434) to existing in scope (as set out in Element 3 of the Original Solution) connection contracts (as set out in the CUSC). This means that for all in scope existing connection contracts, project developers will need to provide evidence of their project(s) meeting the (new proposed) Gate 2 criteria by the deadline (which, at the time of publication of this report, is expected to be in Q2 2025, but after the implementation date and as further described in Element 19 of the Original Solution).

The Panel agreed that the Terms of Reference have been met and agreed for CMP435 to proceed to Code Administrator Consultation. The Code Administrator Consultation will be published on 08 November 2024 and will close at 5pm on 26 November 2024.

CMP435 documentation can be found here.

Key Activities ahead of next panel

Transmission Charging Methodologies Forum: 21 November 2024
Modification Proposal Deadline for November Panel: 14 November 2024
Papers Day: 21 November 2024
