## Code Administrator Consultation Response Proforma

### GC0175: Removing references to “Fax” or “Facsimile” within the Grid Code

Industry parties are invited to respond to this consultation expressing their views and supplying the rationale for those views, particularly in respect of any specific questions detailed below.

Please send your responses to [grid.code@nationalenergyso.com](mailto:grid.code@nationalenergyso.com) by **5pm** on **29 November 2024**. Please note that any responses received after the deadline or sent to a different email address may not receive due consideration.

If you have any queries on the content of this consultation, please contact Ren Walker [lurrentia.walker@nationalenergyso.com](mailto:lurrentia.walker@nationalenergyso.com) or [grid.code@nationalenergyso.com](mailto:grid.code@nationalenergyso.com)

Respondent details	Please enter your details	
Respondent name:	Roddy Wilson	
Company name:	SSEN Transmission	
Email address:	roddy.wilson@sse.com	
Phone number:	44 (0) 1738 342602	
Which best describes your organisation?	<input type="checkbox"/> Consumer body <input type="checkbox"/> Demand <input type="checkbox"/> Distribution Network Operator <input type="checkbox"/> Generator <input type="checkbox"/> Industry body <input type="checkbox"/> Interconnector	<input type="checkbox"/> Storage <input type="checkbox"/> Supplier <input type="checkbox"/> System Operator <input checked="" type="checkbox"/> Transmission Owner <input type="checkbox"/> Virtual Lead Party <input type="checkbox"/> Other

#### I wish my response to be:

(Please mark the relevant box)

**Non-Confidential** (*this will be shared with industry and the Panel for further consideration*)

**Confidential** (*this will be disclosed to the Authority in full but, unless specified, will not be shared with the Panel or the industry for further consideration*)

#### For reference the Applicable Grid Code Objectives are:

- a) *To permit the development, maintenance and operation of an efficient, coordinated and economical system for the transmission of electricity*
- b) *Facilitating effective competition in the generation and supply of electricity (and without limiting the foregoing, to facilitate the national electricity transmission system being made available to persons authorised to supply or generate electricity on terms which neither prevent nor restrict competition in the supply or generation of electricity);*

## Public

- c) *Subject to sub-paragraphs (i) and (ii), to promote the security and efficiency of the electricity generation, transmission and distribution systems in the national electricity transmission system operator area taken as a whole;*
- d) *To efficiently discharge the obligations imposed upon the licensee by this license and to comply with the Electricity Regulation and any relevant legally binding decisions of the European Commission and/or the Agency; and*
- e) *To promote efficiency in the implementation and administration of the Grid Code arrangements*

### **For reference, (for consultation questions 4 & 5) the Electricity Balancing Regulation (EBR) Article 3 Objectives and regulatory aspects are:**

- a) *fostering effective competition, non-discrimination and transparency in balancing markets;*
- b) *enhancing efficiency of balancing as well as efficiency of national balancing markets;*
- c) *integrating balancing markets and promoting the possibilities for exchanges of balancing services while contributing to operational security;*
- d) *contributing to the efficient long-term operation and development of the electricity transmission system and electricity sector while facilitating the efficient and consistent functioning of day-ahead, intraday and balancing markets;*
- e) *ensuring that the procurement of balancing services is fair, objective, transparent and market-based, avoids undue barriers to entry for new entrants, fosters the liquidity of balancing markets while preventing undue market distortions;*
- f) *facilitating the participation of demand response including aggregation facilities and energy storage while ensuring they compete with other balancing services at a level playing field and, where necessary, act independently when serving a single demand facility;*
- g) *facilitating the participation of renewable energy sources and supporting the achievement of any target specified in an enactment for the share of energy from renewable sources.*

#### **What is the EBR?**

The Electricity Balancing Regulation (EBR) is a European Network Code introduced by the Third Energy Package European legislation in late 2017.

The EBR regulation lays down the rules for the integration of balancing markets in Europe, with the objectives of enhancing Europe's security of supply. The EBR aims to do this through harmonisation of electricity balancing rules and facilitating the exchange of balancing resources between European Transmission System Operators (TSOs). Article 18 of the EBR states that TSOs such as NESO should have terms and conditions developed for balancing services, which are submitted and approved by Ofgem.

Public

Please express your views in the right-hand side of the table below, including your rationale.

Standard Code Administrator Consultation questions		
1	Please provide your assessment for the proposed solution against the Applicable Objectives?	Mark the Objectives which you believe the proposed solution better facilitates:
		Original <input type="checkbox"/> A <input type="checkbox"/> B <input checked="" type="checkbox"/> C <input type="checkbox"/> D <input type="checkbox"/> E
		The proposal reflects contemporary communication mechanisms and apparatus that is in common use by the majority, if not all, GC users in other aspects of their business. This provides opportunity for efficiencies in communication between Users and the NESO and, as such, aligns with relevant object A. Security of the system must be maintained, and, in terms of this proposal, the change should provide as a minimum the same functionality as provided by the original fax based arrangements. The proposed modifications look to achieve this, and we therefore tend towards viewing the proposal as Positive against Object C. We consider the proposal as Neutral against the other objectives (B & D).
2	Do you support the proposed implementation approach?	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No
		The phased approach proposal is noted and we believe it is very important that users can become comfortable and confident in the application of the new arrangements before the existing communication methods are set aside.
3	Do you have any other comments?	No
4	Do you agree with the Proposer's assessment that GC0175 does impact the Electricity Balancing Regulation	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No

## Public

	(EBR) Article 18 terms and conditions held within the Grid Code?	Believed to have minimal impact as the EBR article is not considered prescriptive in the method of communication employed.
5	Do you have any comments on the impact of GC0175 on the EBR Objectives?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
