# STC Special Panel Headline Report

## 14 February 2025

The Headline Report is produced after every Panel and aims to provide an overview of the key decisions made. Minutes for this meeting will be published separately.

The following new Modification Proposals were presented to the Panel:

### **PM0142: Application of Gate 2 Criteria to existing background**

This Modification proposes to introduce a new, time-limited, one-off, Procedure to facilitate the introduction of CUSC Modification CMP435.

The Panel unanimously recommended that PM0142 should be issued to the Authority for a decision along with the suite of Connection modifications. However, Panel members requested that they provide voting statements with their views, along with documentation being sent to the Authority, as extra information in relation to this proposal.

PM0142 documentation can be found [here](#).

### **PM0143: Implementing Connections Reform**

A wholesale revision to the connections process has been proposed under CUSC modification CMP434 and STC modification CM095, along with additional changes outside of the codes. This modification aligns the STCPs with the changes proposed under CM095 and the wider connections reform work.

The Panel unanimously recommended that PM0143 should be issued to the Authority for a decision along with the suite of Connection modifications.

PM0143 documentation can be found [here](#).

Other

The Authority representative advised panel members that the Consultation on Connection reform was now available on the Ofgem Website, details can be found [here](#).
