## Headline Report March 2025

The Headline Report is produced after every Panel and aims to provide an overview of the key decisions made. Minutes for this meeting will be published separately.

### New Modifications

The following new Modification Proposal was presented to the Panel:

#### **CMP452: Suspension of TNUoS Payments for generators connecting during the 2024/25 charging year**

This modification would aim to defer the payments for Generators that connect to the transmission system during 2024/25 until there has been a decision on CMP445. Such deferral would follow a request by a Generator.

The Panel unanimously agreed that CMP52 met the Authority's Urgency criteria (a) and therefore recommended urgent treatment. Panel's recommendation was sent on 05 March 2025 seeking an Authority decision by 5pm on 06 March 2025.

The Panel recommended that CMP452 proceed to Code Administrator Consultation.

CMP452 documentation can be found [here](#).
