CMP423 - Terms of Reference

Workgroup Term of Reference	Location in Workgroup Report (to be completed at Workgroup Report stage)
a) Consider EBR implications	
b) Consider implications for the network sharing calculation in the Transport and Tariff model	
c) Consider potential locations for new generation such as via the TEC Register, seabed leasing, or other planning sources	
d) Consider the impact on tariffs that may arise from changes in the way circuits may be placed into either Peak Security and Year-Round buckets.	
e) Consider the impact on demand customers contribution from a different location signal especially those unable to react to those signals	
f) Consider interactions with other Task Force modifications	
g) Consider if the assumption that change in generation will displace generation elsewhere is an appropriate assumption now and in the future.	
h) Consider whether the reduction within generation charges approaches the euro floor in the limiting regulation and what would happen in that circumstance	
i) Consider the scope of work identified and whether this is achievable within the timeframe outlined in the Ofgem Urgency decision letter.
