

# Interconnector Cap and Floor Arrangements

**Damian Clough**

# What is the Cap and Floor regime?

# Need for Change

---

- Changes were made to interconnector licenses in 2016 to include conditions relating to the new regime.
- These changes detail need for ICs to provide data to the SO but not specific processes or dates.
- To give practical effect to these changes.
  - Feed into tariff forecasts.

# Proposal

---

- Current process for data provision for TOs is detailed in the STC.
  - Interconnectors are not signatories of the STC.
- Mirroring the STC ensures consistency.
- Proposal to add this process into Section 9 of the CUSC.
