

Upcoming Changes

Rachel Tullis, National Grid

Clean Energy Package & Future Charging Arrangements

Area	Issue	Impact
Transmission Charges	<p>1) Current drafting includes a provision that grid tariffs should not include unrelated costs supporting other policy objectives such as taxes or levies. We recover items such as AAHEDC, Small Gen Discount, NICFund etc through TNUoS.</p> <p>2) Current drafting states that charges for use of networks shall be applied in a way which does not discriminate between production connected at the distribution level & production connected at a transmission level either positively or negatively</p>	<p>1) May need to review all TNUoS components to confirm which we believe are affected and propose alternative mechanism for those we conclude are.</p> <p>2) May require review of transmission use of system charges to ensure no discrimination.</p>
Connection Charges	<p>3) Current drafting states that connection charges shall be applied in a way which does not discriminate between production connected at the distribution level & production connected at a transmission level either positively or negatively</p>	<p>3) May require review of transmission connection charges to ensure no discrimination.</p>
