

GC0104 Proposal

EU Connection Codes GB Implementation – Demand Connection Code

Grid Code Review Panel
16th August 2017

Objective and Defect

- Objective: Comply with legally binding decisions of the European Commission and/or the Agency
 - DCC is one of the three European Connection Codes and needs to be implemented in GB by September 2018.
- Defect: GC0091 Work Group identified requirements in DCC that either don't currently exist in the Grid Code or there are conflicting requirements in the Grid Code.

Solution

- GC0104 will use the code mapping produced in GC0091 to identify and implement the specific requirements from DCC into the Grid Code to be compliant with EU law.

Code Administrator

Chrissie Brown
